## **Telkore, Inc. Recognized for Safety Record**

### *Bechtel Corporation Honors Telkore with an Award*

Mechanicsburg, PA February 8, 2011 – Telkore, Inc., a full service data and telecommunications installation and maintenance company, announced today that Bechtel Corporation recently recognized Telkore for its safety record. Bechtel Corporation is a global leader in engineering, construction and project management.

“Safety is a top priority for Telkore,” said Ric Wilson, President. “We spend a significant amount of time training others in our industry and we feel strongly that we must lead by example.”

Bechtel Corporation and its partner contractors throughout the country have worked over two million hours without a single lost work day due to safety issues. In its recognition, Bechtel notes that Telkore has “safely performed work that others consider hazardous while at the same time maintaining the quality and efficiency that our customers come to expect.” Bechtel looks forward to future milestones, specifically working three million hours without incident.

“We’re honored by this award,” added Mr. Wilson, “and we look forward to working safely with all of our partners this year. It is a dangerous and challenging industry but with the proper training and expertise, all of our employees are kept safe and the work is completed in a timely and efficient manner.”

### ***About Telkore***

Telkore Incorporated is a full service company that specializes in data and telecommunications installations and maintenance. Telkore’s services include, project management, integration of data systems, installation of wireless data links by way of microwave or infrared networks, installation and maintenance of cellular and radio communications towers and associated equipment (i.e. coaxial lines and antennas) and the testing of these systems. DSL and broadband installation and testing, television and internet cable installation, T-1 installation and testing, coaxial sweep testing and many other services are also available.
